Frontend: HTML5, CSS3, Tailwind CSS, React.js

Backend: Node.js, Express.js

Database: MongoDB, SQL

Developer Tools: Git, GitHub, VS Code

Technologies: Supabase, Chrome Extension API, REST APIs

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Projects

Access AI — React.js, Tailwind CSS, Node.js, Supabase, Groq API, Chrome Extension API [GitHub](#)

- Developed an AI-powered Chrome Extension to summarize, explain, translate, and answer contextual questions on webpages.
- Built a responsive interface using React.js and Tailwind CSS with seamless browser integration through the Chrome Extension API.
- Integrated the Groq API for real-time AI responses and implemented multilingual translation supporting 150+ languages.
- Utilized Supabase for backend services, authentication, and efficient data management.

Certifications

- Java
- Python
- C++
- HTML
- CSS
- JavaScript
